

Reliable People, Dependable Results

Capability Statement

Unlock the potential of your industrial operations with PowerLogix, a leading provider of professional automation, process control and building management system solutions. With a proven track record since 2012, we have consistently delivered exceptional results to a diverse range of industries including mining, water, pharmaceutical, manufacturing & oil and gas.

Our capable team comprised of TÜV certified PLC/DCS Engineers, Instrumentation Technicians and Electricians enable PowerLogix to undertake a comprehensive work scope. Our business philosophy is to meet and surpass client expectations with high quality workmanship delivered on time and within budget.

Innovation Meets Experience

Backed by years of experience and a team of innovative engineers, we combine cutting-edge technology with practical engineering solutions. Our expertise enables us to design and implement automation solutions tailored to your specific needs, ensuring optimal performance and cost-effectiveness.

Comprehensive Services

From project management to system optimization, our comprehensive range of services covers every aspect of automation. We excel in PLC/HMI & DCS software design, SCADA development, data management, trending, analysis and more. Whether you need to streamline operations, enhance safety, or boost productivity, we have the expertise to deliver exceptional results.

Unparalleled Expertise

Our team of skilled professionals possesses an extensive knowledge of various PLC, DCS and SCADA platforms, including Schneider, Siemens, Allen Bradley, Rockwell, and Yokogawa. With a deep understanding of these systems, we can seamlessly integrate them into your existing infrastructure or develop new solutions from the ground up. Our TÜV certification ensures Functional and Machine Safety you can rely on.

Compliance and Reliability

PowerLogix is proud to hold the necessary licences and authorizations to ensure compliance and maintain high standards. Electrical Licencing (Contractor Licence: 74245) and Qualified Instrumentation Technicians enable us to perform Installs, Commissioning, Routine Maintenance and Calibration services.

Client-Centric Approach

We seek to understand your unique requirements, challenges, and goals. With open communication channels and a collaborative mindset, we work together with our clients to achieve outcomes that drive business forward.

PowerLogix provides clients well documented, optimized and cost effective automation solutions. We have the skills, experience, and dedication to transform your industrial processes into streamlined and intelligent systems.
